REHABILITATION OF WATER MAIN REGENT ROAD & CORNWALL AVENUE

Dear Resident,

The Town will begin water main rehabilitation work on your street starting **Monday, April 27, 2026**. This work carried out by **Vortex Infrastructures Inc.** will last several weeks.

Nature of the Work

The project involves inserting a structural liner inside the existing pipes, through access traps, to extend their lifespan. This method requires minimal excavation, reducing disruptions to your surroundings.

Water Supply During the Work

Since your water connection is located along the affected section, a **temporary above-ground water system** will be installed to ensure your access to drinking water throughout the duration of the work.

Please note that a **temporary water interruption** will be necessary when switching from the underground network to the temporary system and again when reconnecting to the main water line. These interruptions will last **a few hours**, and you will receive a **written notice 24 hours in advance** with detailed instructions.

Traffic and Access

The work may cause **temporary traffic disruptions** on your street. We will do our best to **minimize inconveniences** and ensure safe access to residents and businesses.

Project Updates

You can follow the progress of the work on the Town's website: www.ville.mont-royal.qc.ca, under the "News" section.

Important Information

- In case of emergency, the contractor's emergency service is available **24/7** at **579-229-0342**
- Any areas affected by the work (laws, driveways, paving, sidewalks) will be **fully restored after the project is completed**.
- There may be **periods of inactivity** during the project, such as waiting for laboratory test results.

This work is essential to maintaining the water distribution system. We are committed to minimizing any inconvenience and completing the project as quickly as possible.

Thank you for your understanding and cooperation.
